## ACHEIVEMENTS

### Sand Battery

2024

A sand battery system designed for household usage stores renewable electricity in the form of thermal energy by heating sand, which retains the temperature for extended periods. The system captures energy from renewable sources like solar or wind, then releases stored heat for space heating or hot water, providing an efficient and sustainable way to manage household energy needs.

### Online Shopping Interface

2024

Using Figma

- Built an online shopping interface: Designed a user-friendly platform for browsing, cart management, and checkout.
- Integrated payment and order processing: Enabled secure payments and order management for seamless transactions.

### Milk Packet Litter Separation tool

2023

A milk packet litter separation tool is a device designed to prevent plastic fragments from breaking off when cutting open milk packets. It features a precise cutting mechanism that ensures a clean, controlled cut while keeping plastic pieces intact, facilitating easy disposal and reducing waste.
